

DR. ABEER ALALMAIE

CV, Ph.D. Cybersecurity & Artificial intelligence | 12+ Years of Multifaceted Exp

| Adress: Riyadh, Saudi Arabia | Tele: +966 533004838 | Email: abeer.alalmaie@gmail.com |
LinkedIn Profile | Nationality: Saudi |

PROFESSIONAL SUMMARY

Innovative cybersecurity and artificial intelligence leader with 12+ years of diverse experience across higher education, academic leadership, research supervision, and industry-driven innovation. Founder of a cybersecurity and AI solutions company, with proven success in leading cross-functional teams, managing large-scale IT infrastructure projects, and establishing strategic partnerships with government, industry, and academia.

Recognized for pioneering **14+ national and international innovations** in cybersecurity, defense, healthcare, and smart technologies, delivering transformative impact in environmental sustainability, digital governance, and societal well-being. Adept at providing high-level consulting, policy advisory, and executive training, with a strong track record of presenting at global conferences including **TEDx**.

Driven by a passion for excellence and continuous advancement, I combine deep technical expertise with visionary leadership to design and implement AI-powered solutions that address critical challenges, strengthen national resilience, and position Saudi Arabia at the forefront of global innovation. Currently seeking high-impact opportunities to lead initiatives in innovation ecosystems, IP commercialization, information security, and artificial intelligence—applying expertise to accelerate digital transformation and shape the future of technology.

EDUCATIONAL BACKGROUND

Ph.D. in Cybersecurity and Artificial intelligence **May/2024**
| University of Technology Sydney, Australia

Master of Information Systems | Griffith University, Australia **2009**

Bachelor's Degree in Computer Science | King Saud University, Saudi Arabia **2004**

PROFESSIONAL EXPERIENCE

Advisor to the President of King Khalid University for IP Commercialization **Jan 2025-Present**
King Khalid University | Abha, Saudi Arabia

Providing strategic advisory on technology transfer and IP commercialization, developing policies and regulations, overseeing national innovation portfolios, and enhancing partnerships with local and international entities in alignment with Saudi Vision 2030.

Director, Technology Transfer & IP Commercialization Office – King Khalid University **Jan 2025-Present**
King Khalid University | Abha, Saudi Arabia

Leading the office in building an integrated innovation and commercialization ecosystem, supervising patents and agreements, and activating investment partnerships with government and private sectors to transform research and innovation outputs into impactful products and services.

Assistant professor of cybersecurity and Artificial Intelligence **2024-Present**
King Khalid University | Abha, Saudi Arabia

- Teach courses in cybersecurity, artificial intelligence (AI), and related fields.
- Develop new courses and update existing ones to stay current with advances in cybersecurity and AI.

- Supervise student projects, theses, and dissertations.Direct daily operations, overseeing resource allocation, project timelines, and quality control measures to ensure consistent achievement of financial targets, operational excellence, and high standards of service delivery and client satisfaction.
- Conduct cutting-edge research in cybersecurity, AI, machine learning, and data science.
- Publish research findings in reputable peer-reviewed journals and present at international conferences.
- Collaborate with colleagues across the university and in other institutions on multidisciplinary research.
- Build partnerships with industry, government, and academic institutions to promote cybersecurity and AI initiatives.
- Organize and participate in conferences, workshops, and seminars related to cybersecurity and AI.
- Participate in departmental meetings, university committees, and other academic activities.
- Contribute to program accreditation and evaluation processes.

Founder of Cyber Sky Company **2021-Present**

- Founded Cyber Sky Company in Sydney, a provider of Cyber Security and AI Solutions & Services, and defined strategic goals and future vision aimed at establishing the company as a leader in innovative technology services.
- Direct daily operations, overseeing resource allocation, project timelines, and quality control measures to ensure consistent achievement of financial targets, operational excellence, and high standards of service delivery and client satisfaction.
- Foster strategic partnerships and nurture relationships with high-profile clients, driving sustainable business growth and expanding market presence, with the aim of establishing the company as a trusted industry leader.
- Devise and execute strategic initiatives for business growth and market expansion, identifying new opportunities in the technology solutions sector and adapting to evolving industry trends.

Cyber Security and Artificial intelligence PhD Researcher **Jul 2019-May 2024**
University of Technology Sydney | Sydney, Australia

- Facilitated academic excellence by leading interactive seminars, supporting course delivery, and conducting assessments for undergraduate and graduate-level cybersecurity programs.
- Developed and executed research methodologies, including hypothesis formulation and experimental design, to address critical cybersecurity challenges, advancing the field's understanding of key issues.
- Created advanced algorithms, tools, and frameworks to address emerging cybersecurity threats, driving improvements in system security and resilience.
- Authored and published research findings in peer-reviewed journals and presented at conferences, disseminating key insights and establishing a reputation in the cybersecurity research community.
- Continuously monitored and incorporated the latest trends, tools, and advancements in cybersecurity, through regular participation in industry conferences, seminars, workshops, and professional development activities.

University Lecturer **Dec 2015-May 2019**
King Khalid University | Abha, Saudi Arabia

- Instructed and delivered academic courses across a wide spectrum of computer science and IT subjects, ranging from foundational topics like Data Structures to advanced fields such as Artificial Intelligence and Virtual Reality.
- Mentored and supervised students' research projects, strengthening analytical thinking and research competencies through individualized guidance and academic advising, while advancing student academic growth.
- Led curriculum modernization initiatives through active participation in academic committees, leveraging industry insights to keep course content in line with evolving industry practices and enhance overall program quality.

Dean, College of Science, Arts and Community **2017**
King Khalid University | College of Science, Arts and Community – Rijal Almaa

- **Led** the strategic and academic development of the college in alignment with university goals.
- **Oversaw** academic programs, quality assurance, and accreditation processes.

- **Supervised** faculty performance, recruitment, and professional development.
- **Managed** administrative operations, resources, and institutional planning.
- **Strengthened** collaboration with academic, governmental, and community partners.

Vice Dean for Development and Quality **2016**
King Khalid University | College of Science, Arts and Community – Rijal Almaa

- **Led** quality assurance and continuous improvement initiatives across academic programs.
- **Oversaw** accreditation requirements, program evaluation, and institutional performance indicators.
- **Coordinated** strategic planning and development activities within the college.
- **Supervised** the implementation of academic quality standards and internal review processes.
- **Supported** faculty development and initiatives aimed at enhancing teaching and learning outcomes.

Head of the Computer Club **2015**
King Khalid University | College of Science, Arts and Community – Rijal Almaa

- **Led** student-led technology initiatives and computing activities within the college.
- **Organized** workshops, competitions, and events to promote programming and digital skills.
- **Encouraged** student innovation and collaboration in computing and technology projects.
- **Coordinated** academic and extracurricular activities related to computer science and information technology.

Head of Administrative Development **2014**
King Khalid University | Deanship of Academic Development and Quality– Rijal Almaa

- **Led** administrative development initiatives to improve institutional performance.
- **Developed** policies and procedures to enhance organizational efficiency.
- **Coordinated** training and development programs for administrative staff.
- **Supported** quality improvement and institutional development initiatives.

Assistant to the Vice Dean of Information Technology **2014**
Imam Muhammad ibn Saud Islamic University | Saudi Arabia

- **Supported** the Vice Deanship in managing information technology initiatives and operations.
- **Coordinated** administrative and technical activities related to IT services.
- **Assisted** in planning and implementing IT development projects within the university.
- **Facilitated** communication between IT departments and academic units.

General Supervisor of Information Technology Deanship (Female Section) **2012-2013**
King Abdullah City for Female Students | Saudi Arabia

- **Supervised** the operations and services of the Information Technology Deanship for the female campus.
- **Managed** IT systems, technical support, and digital infrastructure.
- **Coordinated** technology initiatives to support academic and administrative units.
- **Oversaw** the implementation of IT policies and operational procedures.

Internal Executive Assistant in the Automated Transportation System **2012**
Female Student Study Centre - Imam Mohammad Ibn Saud Islamic University | Riyadh, Saudi Arabia

- Managed and oversaw the daily operations of the automated transportation system, ensuring efficient and smooth functioning that met the needs within the Center.

- Provided crucial administrative support for daily operations, coordinating among cross-functional teams to align objectives and enhance operational effectiveness, resulting in improved system reliability.
- Actively contributed to system improvements by facilitating communication among diverse teams and addressing operational challenges, ensuring continuous service enhancement and operational efficiency.

Information Technology Supervisor **2011**
Prince Salman University | Al-Kharj, Saudi Arabia

- Directed IT infrastructure across the university, implementing security measures and ensuring optimal performance to effectively support a broad community of students and staff.
- Managed the technical support team, overseeing operations, coordinating troubleshooting, and implementing process improvements to ensure reliable system performance and user support.
- Partnered with department heads to assess and address technology needs, based on that developed and executed strategic IT modernization plans, aligning IT services with educational and administrative objectives significantly improving efficiency and user experience.

Certified Computer Supervisor **2011**
Technical and Vocational Training Corporation | Riyadh, Saudi Arabia

- Oversaw operations and maintenance of complex computer systems and software while leading and mentoring technical support teams, ensuring optimal performance and minimal downtime through implemented best practices that enhanced service quality and response times.
- Implemented and updated policies and procedures related to information technology, ensuring organizational IT practices remained current and effective.
- Developed and delivered technical training programs for staff, enhancing the organization's overall tech proficiency and reducing technical support workload.

Computer Trainer **2011**
King Saud University | Riyadh, Saudi Arabia

- Created training programs and taught computer technology courses, tailoring content to meet diverse learning needs and keep pace with industry changes.
- Tracked student progress and documented performance to evaluate trainees and enhance training programs, resulting in improved learning outcomes and personalized support.
- Offered individualized guidance on computer technologies, enhancing students' technical skills and confidence in using various software applications.

Trainer for the Administrative Communications System **2011**
Imam Mohammad Ibn Saud Islamic University | Riyadh, Saudi Arabia

- Developed engaging training materials and conducted workshops and training on administrative communication systems, delivering lectures that effectively bridged theoretical knowledge with practical application of related technologies.
- Conducted in-depth analysis of training outcomes, to measure training effectiveness, identify areas for improvement, and track participant progress in administrative communication skills.

Systems Analyst & Designer **2011**
Imam Mohammad Ibn Saud Islamic University | Riyadh, Saudi Arabia

- Conducted in-depth analysis of system requirements, designing scalable solutions that aligned with both business objectives and technical constraints.
- Collaborated with cross-functional development teams to translate complex requirements into actionable technical solutions, ensuring implementation and integration of new systems.
- Provided recommendations for system enhancements and upgrades, leveraging data-driven insights to align technology infrastructure with evolving business needs.

Information Technology Assistant Lecturer 2010

King Saud University | Riyadh, Saudi Arabia

- Delivered IT academic courses and collaborated with senior faculty to continually update curriculum content, demonstrating adaptability and expertise in rapidly evolving technologies while enhancing students' learning outcomes.
- Guided student researchers from concept to completion, fostering critical thinking and research skills while overseeing diverse IT projects.

Collaborative Information Systems Lecturer 2009

Prince Salman University | Al-Kharj, Saudi Arabia

- Delivered engaging lectures on collaborative information systems, incorporating real-world case studies and practical applications to enhance student comprehension of modern business technologies and bridge the theory-practice gap.
- Conducted research projects on collaborative information systems, contributing to the field's knowledge base and supporting the university's academic initiatives.
- Mentored and supervised students' research projects, providing academic guidance in collaborative information systems and supporting them through various stages of their research process.

Supervisor of Computer Department Activities 2009

Prince Salman University | Al-Kharj, Saudi Arabia

- Organized and managed diverse academic and extracurricular activities for the Computer Department, including planning, coordinating, and overseeing events that aligned with departmental and university goals.
- Facilitated academic and administrative processes, offering direct support to students and faculty members to enhance departmental efficiency.
- Ensured all departmental activities and events adhered to university policies and guidelines, maintaining a high standard of professionalism.
-

Leadership Achievements & National Impact

- Achieved **global recognition** through participation in **the world's largest government hackathon (Absher Hackathon)**, in collaboration with the **Absher Platform**, officially entering the Guinness World Records and qualifying for the final nomination stage at a global level.
- Led the development of an **AI-powered accessibility layer for Absher government services**, enabling direct, voice-based access to government services for elderly citizens, visually impaired individuals, and persons with disabilities, through **advanced speech-to-service AI technologies**; designed, developed, and delivered a functional **prototype** of the AI-powered accessibility layer.
- **Delivered three specialized workshops as part of the Absher Hackathon** benefiting **1,450** participants, focusing on national security, cybersecurity, and government service innovation, with broad national impact:
  - **Future National Security Workshop**
    Addressed the **integration of cyberspace and outer space** and its impact on **digital sovereignty and national security** in the Kingdom of Saudi Arabia.
  - **Cybersecurity in Future Smart Cities Workshop**
    Reached **700+ participants**, focusing on **secure digital infrastructure, urban resilience, and smart city cybersecurity frameworks**.
  - **Government Service Innovation Workshop**
    Engaged **500+ beneficiaries**, highlighting **AI-driven, citizen-centric digital government services and transformation** within the Absher ecosystem.
- Led and established an **integrated institutional innovation ecosystem** at King Khalid University, transforming research outputs into market-ready and commercially viable innovations.
- **Launched 21 high-impact innovations** across cybersecurity, artificial intelligence, security systems, forensic technologies, healthcare, and energy.

- Supervised the **registration of 5 national patents** in advanced cybersecurity, smart forensic systems, AI-based detection, and biological analysis.
- Designed and delivered **sovereign cybersecurity and innovation programs** tailored for government and national security entities.
- **Trained over 950 security officers**, including:
  - 600 forensic officers in advanced AI and cybersecurity applications
  - 350 officers in security innovation and field deployment programs
- Executed **11 specialized national training programs** in cybersecurity, innovation, and technology transfer, reaching **2,948 beneficiaries**.
- Delivered strategic technical programs under **Saudi Ministry of Interior initiatives (Absher – Tuwaiq)**.
- Contributed to transforming approximately **44 university innovations** into commercially viable prototypes, strengthening the link between academic research and industry investment.
- Concluded **12 strategic MoUs and agreements** with governmental, private, and international entities.
- Represented the university in **15 national and international conferences, forums, and hackathons** including the **NASA Space Apps Challenge**, **Aseer Innovates Hackathon**, and **the Innovation and Entrepreneurship Conference**, achieving advanced rankings and nominations among the top innovations across Saudi universities.
- Conducted specialized programs and workshops in innovation, entrepreneurship, medical technologies, and bio-data analytics, including initiatives such as **DNA to DATA**, **Discover Your Idea**, **medical innovation programs**, and **rapid prototyping development**.
- Contributed directly to **strengthening national security and sovereign technologies**, aligned with **Saudi Vision 2030**.

SIGNATURE COMPETENCIES

Cybersecurity Leadership | AI Solutions Development | Strategic Business Planning | IT Infrastructure Management | Project Management | Network Security | Digital Transformation Strategies | Business Process Optimization | Systems Analysis and Design | Risk Assessment and Management | Strategic Partnerships Development | Quality Assurance | Visionary Leadership | Strategic Thinking | Innovative Problem-Solving | Collaborative Mindset | Mentorship and Talent Development | Analytical Thinking | Stakeholder Management | Emotional Intelligence | Results-Driven Approach |

MEMBERSHIPS

Consultant | International Institute of Business Analysis **2023-2024**

- Provided expert business analysis consultancy, developing efficiency-enhancing strategies, conducting system/operations assessments, offering improvement recommendations, implementing solutions with cross-functional teams, delivering training, and advising on the latest tools and technologies in business analysis.

Dean of Science and Arts | Rijal Alma College, King Khalid University - Abha, Saudi Arabia **2017**

- Provided strategic leadership for the faculty, overseeing academic programs, faculty development, and research initiatives while managing administrative operations and representing the college at high-level meetings.

Deputy for Development and Quality | King Khalid University - Abha, Saudi Arabia **2016**

- Led university-wide quality enhancement and development initiatives, implementing quality assurance processes and performance monitoring metrics. Drove institutional effectiveness through strategic planning and accreditation compliance, ensuring continuous improvement across academic and administrative functions.

Member of the Interview Committee | Imam Mohammad Ibn Saud Islamic University - Riyadh, Saudi Arabia **2011**

- Played a key role in faculty and staff recruitment, designing and conducting interviews to assess candidates and ensure alignment with university standards and policies.

Member of the Quality Committee | Prince Salman University - Al-Kharj, Saudi Arabia **2009**

- Contributed to the development and implementation of quality assurance policies and procedures, evaluated academic and administrative processes against established standards, conducted internal audits and assessments to identify improvement areas, and provided recommendations to enhance overall institutional quality.

COURSES & CERTIFICATES

Completed +35 courses and training programs, with several notable ones listed below:

No Code AI and Machine Learning: Building Data Science Solutions **In Progress**

MIT Professional Education

Criminal Justice and Criminology Course **In Progress**

Australia

Cybersecurity and IT Proficiencies: • CompTIA Linux+ • Cyber Hacker Certified (CHC) • Security+ Fundamental • Cyber Web Certified (CWC) • Ethical Hacking with Kali • CCNA • Visual Basic .NET (2014) • SQL/P Constructivist language of inquiry (2014).

Leadership and Management: • Course in Academic Leadership (2011) • Professional Project Management (PMP) course (2012) • Microsoft Manager (2012) • Conflict Management in the Work Environment (2013).

PATENTS

Intelligent security safe system: • The smart security and protection system is an integrated monitoring solution designed to operate in parallel with existing operational systems. • It is specifically tailored to enhance the security of industrial, petroleum, energy, and water production facilities. • The system protects these facilities from cybersecurity threats targeting operational systems, while also monitoring equipment operations to ensure their safety.

Additionally, • the system safeguards buildings, lives, the environment, and property by continuously overseeing equipment performance and ensuring the overall integrity of the facility.

INVENTIONS

1. **Cybersecurity & National Defense:**
    - **Zero Trust Intrusion Detection Systems (ZTA-IDS)** – Multi-view AI architecture for next-generation cyber defense.
    - **Autonomous combat robots** – ai-powered ground robots for autonomous battlefield operations.
    - **Smart missile systems** – ai-integrated guided missiles for precision targeting and autonomous navigation.
    - **Smart defense drones** – unmanned aerial vehicles with ai and open-source control for dynamic mission decisions.
    - **Life shield bag** – smart humanitarian bag for nuclear radiation protection (including gamma rays).
    - **Smart prison control rooms** – ai and digital twin–based centralized system for secure prison monitoring and emergency management.
    - **Advanced crowd management technologies** – ai-driven solutions for real-time crowd monitoring, prediction, and safety.

- **Cyber Guardian Connect –** AI-powered child cyber protection app monitoring digital activities, detecting suspicious behavior, and enabling instant connection with "Kulona Amn" and cybercrime units.

2. **Healthcare & Humanitarian:**
   - **Mounis Robot –** Saudi national AI-powered companion robot for elderly care and remote health monitoring.
   - **Graphene Ventilator Battery –** Lightweight, fast-charging graphene battery providing 24-hour portable ventilator operation.
   - **Bee Care Mobile Clinics –** Drone-supported mobile health clinics for rural and underserved communities.
   - **Tanaffus System –** AI-powered integrated system to accelerate lung transplant processes through data analysis and donor-patient matching.
   - **Discovery, Research & Recovery Center –** A research and wellness hub in Qais Mountains integrating advanced facilities with natural spaces to inspire innovation and productivity.
   - **Smart Cyber Companion for the Visually Impaired** – AI-powered wearable device providing safe digital navigation through real-time audio content analysis and security alerts.

3. **Autism & Cognitive:**
   - **AURA Smart Bracelet –** Wearable device analyzing behavioral emotions of children with autism for improved therapeutic insights.
   - **Saned Smart Assistant** – AI-powered personal assistant (device/app) supporting adolescents and adults with autism to lead more independent lives.
   - **Sensory Garden –** Intelligent therapeutic and recreational space designed for children and adolescents with autism to enhance sensory integration and well-being.

4. **Environmental & Agricultural:**
   - **BEESD BEEHIVE Monitoring System –** Edge computing and deep learning solution for hive health monitoring and honey production optimization.
   - **BeeSentinel – AI-based system using trained honeybees to detect narcotics and enhance customs security.**
   - **Bee Care –** Integrated solution with a Smart Bee Clinic, Mobile Pharmacy, and Rapid Detection Unit for early disease prediction and hive protection.
   - **B-DETECT –** AI-powered bee-based detection system for explosives in national security applications.
   - **EcoAgri Defender –** Smart drone for palm pest detection, targeted pesticide spraying, and automated removal of damaged trees.
   - **Forest Shield –** AI and sustainability-driven system to protect forests and reduce wildfire impact.
   - **Smart Falcon (Strategic Multi-Purpose Drone) –** Modular drone system with interchangeable mobile labs for environmental and industrial monitoring.
   - **Camel Tracker –** Intelligent system to detect stray camels, track health data, monitor competitions, and facilitate ownership transfers.
   - **Noble Horse –** Smart platform integrating modern technologies for horse care, health monitoring, data management, and legal documentation.

5. **Smart Governance, Education & Infrastructure:**
   - **Emara Vision 360 –** Comprehensive smart governance platform connecting all 13 Saudi emirates, enabling secure, fast decision-making and citizen engagement.
   - **National Integrity & Transparency Tool –** AI system for early detection of financial and administrative irregularities, aligned with Nazaha standards.
   - **SmartGovSpend –** AI-based tool to monitor and optimize public spending, forecast budgets, and detect anomalies for government efficiency.
   - **Smart Governance for Leaders –** AI-driven platform supporting leaders in performance monitoring, strategic management, and professional development.
   - **Trust & Achievement Platform –** Digital hub linking achievements, KPIs, and evidence-based documentation for accountability.

- **Fair Media AI Toolkit –** Multilingual platform for unbiased news publishing, fact-checking, and real-time violation alerts.
- **Aseer Majestic Express –** High-speed mountain train connecting Al-Soudah to the Red Sea, boosting tourism, economy, and regional integration.
- **Afaq Aseer – Future Innovation Center –** Hub for innovation and advanced technologies under HRH Prince Turki bin Talal, fostering future economy.
- **Advanced Smart Professor System –** AI platform analyzing teaching performance and enhancing learning outcomes.
- **Kafa'a (Efficiency App) –** AI tool to improve workforce productivity and workplace efficiency.
- **Osuda Autonomous Vehicle –** Futuristic self-driving car concept symbolizing Saudi strength, intelligence, and design innovation.

AWARDS & RECOGNITIONS

- Award of Excellence – Best Dean for Student Services *(2018)*
- Dean's Honour List – Australia *(2024)*
- Shield of Appreciation from H.E. Director General of Public Security, Saudi Ministry of Interior – for contribution with **13 security innovations**
- Shield of Appreciation from the General Department of Forensic Evidence – for the national-level forensic biology innovation **BioScan Forensic**
