Amna Kashgari

Head of Radiology AI Transformation

Responsible AI in Healthcare | Pediatric Radiologist

Profile

Visionary consultant, radiologist, and healthcare transformation leader with expertise in artificial intelligence, digital health strategy, healthcare innovation, and enterprise transformation. I bridge clinical excellence, emerging technologies, and strategic execution to modernize radiology services and deliver measurable improvements in clinical quality, operational performance, and patient outcomes.

My work focuses on designing and implementing responsible AI governance, optimizing clinical workflows, enabling data-driven decision-making, and leading digital transformation initiatives across the Saudi healthcare ecosystem. Passionate about advancing the future of healthcare through innovation, collaborative leadership, and technology-enabled transformation, I am committed to supporting Saudi Vision 2030 by building scalable, sustainable, and patient-centered healthcare solutions.

Core competence

Responsible AI in Healthcare | Radiology AI Transformation | Clinical AI Governance | AI Validation on Local Data | Post-Deployment Monitoring | Healthcare Policy Development | Safety Reporting and Auditing | Algorithm Performance Monitoring | Digital health transformation | Strategic planning and execution | Health innovation management | Change management| Transformation leader

Projects and initiatives

AI Governance Framework for Radiology
We developed a comprehensive AI framework tailored to the radiology department. This includes guidelines for selecting AI models from various vendors, defined selection criteria, detailed validation methods, and post-deployment monitoring. Furthermore, we crafted departmental policies and procedures to guide radiologists in the use of AI, ensuring ethical standards and responsible deployment.

AI Model Validation Across Vendors
In this project, we rigorously validated AI models from multiple companies. Each model was benchmarked against ground-truth data derived from radiologists' reports, ensuring that the AI's performance met or exceeded clinical standards.

AI machine revolution project
In partnership with different vendors, we initiated an AI revolution in the department. This involved a comprehensive review of all GE AI solutions for deployment across X-ray, CT, and MRI systems in the hospital.

3D lab and 3D printing Departmental policy and procedure
We also established a departmental policy and procedure governing the 3D printing lab. This policy outlines the requisition process, workflow, and governance for radiologists and physicians. Additionally, we set key performance indicators (KPIs) for each 3D printing process to track efficiency, usage, and clinical impact.

3D Printing Initiative
We launched a project to procure a state-of-the-art 3D printer, enabling us to produce detailed anatomical models for surgical planning, education, and research, following the Radiological Society of North America guidelines.

MRI-Compatible Virtual Reality (VR) project
We conducted a proof-of-concept for MRI-compatible VR, showing outstanding results: patient satisfaction at 90%, family satisfaction at 90%, and MRI turnaround times improved by 60%. Notably, one patient avoided the need for anesthesia, which was a remarkable outcome.

Experience

Section head, Translational Radiology Science (AI, VR, and 3D Printing) / Head of Radiology AI Transformation, Medical Imaging Department, King Abdulaziz Medical City (MNGHA). 2024-present

Assistant professor at the radiology, King Saud University for Health Science, KSAU-H 2014-present

Paediatric radiology and paediatric neuroradiology consultant, King Abdullah Specialized Children's Hospital (KASCH) 2012- present

Radiology residency training program director (RTP), King Abdulaziz Medical City (MNGHA). 2016- 2019

Education

Master's Degree in AI Healthcare Management (In Progress) 2023–Present
Cambridge Associated University, Switzerland

Postgraduate Program in AI for Leaders | The University of Texas at Austin, USA Sept 2024

European Diploma in Radiology (EDiR) | European Board of Radiology (EBR), Vienna, Austria Mar 2018

Fellowship in Pediatric Radiology & Pediatric Neuroradiology | Dalhousie University, Canada 2010-2012

Saudi Board of Radiology (SSC-Rad) |Graduated with Honors 2009

Bachelor of Medicine and Surgery (MBChB)) |King Abdulaziz University, Jeddah, SA. Graduated with Honors

Artificial intelligence and leadership certifications

World Health Organization (WHO) | Ethics and Governance of Artificial Intelligence for Health Apr **2026**

Harvard Medical School Executive Education | Leading Digital Transformation in Healthcare Dec **2025**

Harvard Medical School Executive Education | AI in Healthcare: From Strategy to Implementation. Oct **2025**

Harvard T.H. Chan School of Public Health | Responsible AI for Healthcare: Concepts & Application Feb **2025**

MIT Professional Education | Artificial Intelligence in Healthcare: Fundamentals &Applications Apr **2024**

Radiological Society of North America (RSNA) | Imaging AI Emergency May **2024**

Radiological Society of North America (RSNA) | Foundational Imaging AI Certificate Program Sept **2022**

MBSC Executive Education | Leadership Essential Program Certificate Mar **2022**

American Roentgen Ray Society | **Machine** Learning and AI in Radiology June **2021**

Selected regional & international conference participation in Artificial Intelligence (Speaker)

Annual health specialization conference KSAU-HS |**Artificial intelligence in healthcare: current and future perspectives** | Saudi Arabia | Dec 2025.

10th Radiological Society of Emirate Annual Meeting | Artificial Intelligence: Hope and Challenges in Pediatric Radiology | UAE | Apr 2026.

Radiology, Dubai | When Machines See: Ethics and Responsible AI in Imaging | UAE | Feb 2026.

Fundamentals of AI in Healthcare | AI Ecosystem: Challenges and Risks | Saudi Arabia | Dec 2025.

4th Medical Education Conference| Ethical dimension in AI in medical education | Saudi Arabia | Nov 2025

16th Annual Radiological Society of Saudi Arabia(RSSA) | Responsible AI in radiology | Saudi Arabia| Nov 2025

Global Health Summit | Radiology Bottleneck in Era of AI | Saudi Arabia | Oct 2025.

Artificial Intelligence and Data Summit 2025 | Beyond Hype in AI Healthcare: LLM Hallucination | Saudi Arabia | Oct 2025.

Saudi Medtech 2025 | Status of AI in Radiology in Saudi Arabia | Saudi Arabia | Sep 2025.

Neom Monday Academic Activities Lectures | AI with Integrity: Beyond Hype in Healthcare | Saudi Arabia / Online | Sep 2025.

Symposium on Human-AI Collaboration, Heriot-Watt University | Operational and Strategic Implementation of AI | UAE | May 2025

Radiology AI Summit, London Institute for Healthcare Engineering | Future of Radiology: Ranking Biggest Challenges and Opportunities | United Kingdom | Feb 2025.

2nd Pan Arab Association of Radiology AI Forum | Ethics in Artificial Intelligence in Medical Imaging | UAE | Sep 2024.

Current research in Artificial intelligence in healthcare

Repurposing Adult AI Radiograph Interpretation Models for Neonatal Care Through Continual Learning: An International Multi-Center Study | International multi-center collaborative manuscript under review, submitted Mar 2026.

Awareness of Responsible AI in Healthcare Across the Gulf Region | Manuscript in preparation.

Artificial intelligence versus Radiologists ACR TI-RADS Classification in Thyroid nodules Risk stratification | Manuscript submitted

Technical and clinical assessment of deep learning-assisted vs. conventional Shoulder MRI at King Abdulah Specialized Children's Hospital | Manuscript submitted

Professional committee membership and educational leadership (selected)

Scientific Committee Member | 16th Annual Meeting, Radiological Society of Saudi Arabia (RSSA) | KSA | Nov 2025 | AI in radiology tract chairman.
Scientific Committee Member | 15th Annual Meeting, Radiological Society of Saudi Arabia (RSSA) | KSA | Nov 2024 | AI in radiology tract chairman.
Scientific Committee Member | Royal College of Radiology Global Congress | Dubai |UAE | Oct 2022.
Scientific Committee Member | 12th Annual Meeting, Radiological Society of Saudi Arabia (RSSA) | KSA | Oct 2019.
Scientific Committee Member | 5th International Conference of Radiation Medicine (ICRM). KFSH | KSA | Feb 2018.
Head of Scientific Committee Member | 10th Annual Meeting, Radiological Society of Saudi Arabia (RSSA) |KSA| Oct 2017.
Saudi Board Examiner | Oral Examination for Diagnostic Radiology | SA | 2015–2017.
Scientific Committee Member | 9th Annual Meeting, Radiological Society of Saudi Arabia (RSSA) | KSA | Oct 2016.
Founder | Image Gently campaign at King Abdullah specialized children's hospital | KSA 2015.
Director and founder | Annual KAMC Radiology Residents Review Course | KSA (4 years) 2014–2019.
Director and founder | Hot-Seat Radiology Residents Course, KAMC | KSA | Jan 2013.

Honorary and awards

CEO award -Certificate of appreciation – Outstanding contribution and efforts in the improvement of the clinical services provided at King Abdulaziz Medical City, Riyadh, KSA. Year 2025

CEO award- Certificate of appreciation – Medical imaging patient access initiative project. King Abdulaziz Medical City, Riyadh, KSA. Year 2024

Certificate of appreciation "51st Conjoined twin separation– KASCH - King Salman humanitarian and relief centre, May 2022

Certificate of appreciation 50th Conjoined twin separation – KASCH - King Salman Humanitarian and Relief Centre, Riyadh, KSA. July 2021

Certificate of appreciation 49th Conjoined twin separation – KASCH - King Salman Humanitarian and Relief Centre, Riyadh, KSA Nov 2019

Certificate of appreciation 48th Conjoined twin separation – KASCH - King Salman Humanitarian and Relief Centre, Riyadh, KSA. Dec 2018

Champion of education award for the medical imaging department, King Abdulaziz Medical City, Riyadh, KSA. Year 2017

Honour degree – Saudi Board of Radiology Year 2008

2nd honour degree – School of Medicine, King Abdulaziz University, Jeddah Year 2001
