Ministry of Health Saudi Arabia - Riyadh

****Business Intelligence Project Leader*** ***Nov. 2011 – Feb. 2013***

*Worked on a pilot project that aimed for building a data warehouse within the Ministry of Health, which contains the information of several hospitals.

*My tasks handled planning the initial stages for the pilot project: data models, data dictionary maintaining KPIs definitions, supervising the ETL/OLAP processes, planning the hardware requirements, as well as planning the requirements for some executive dashboards.

(2 recommendations available upon request)

King Faisal Specialist Hospital & Research Center - Riyadh

****Data Warehouse Project Leader*** ***(Promotion)*** ***Jan. 2010 – Sept. 2011***

*During my work in KFSH&RC, one of my duties was to supervise the technical work for a team of 9 members from different cities (Riyadh and Jeddah).

*In addition, I participated in generating many analytical reports, dashboards and scorecards that are being used by the hospital's executives to measure the performance of the hospital, through the development and automation of key performance indicators (KPIs).

*Part of my previous Enterprise projects experience was: Building a data warehouse starting from the Data Model, and Data Dictionary, until the generation of Enterprise Dashboards and Scorecards for executive decision-making, based on a set of internationally defined KPIs. *

* I have been a project leader in an area that mixes both technology and health care.

(7 recommendations available upon request)
