Biography

Chair and full Professor of Diagnostic Radiography, Head of the Discipline of Medical Imaging and Radiation Therapy and Course Director for the MSc in Diagnostic Radiography and the MSc in Radiation Therapy in University Colleg Cork (UCC)

Independently verified as among the most prolific authors in Medical Radiation Sciences globally. My research has been disseminated through major international imaging meetings, and over 350 original papers have been published in highly ranked radiological journals. I have 4600+ citations for my work, my h-index is 35, and my i10 index is 125 (Nov 2025). Involved with $3.8m in research funding.

Recognised by peers and learned societies through appointment as a Senior Fellow of the Higher Education Academy and a Fellow of the Irish Institute of Radiography and Radiation Therapy.

Received multiple teaching awards in each of the three higher education institutes he has worked in, including the UCC President's Award for Excellence in Teaching (2025), UCC Established Career, Team Award (2024), the University of Sydney Vice Chancellor's Award for Excellence in Higher Degree Teaching, University of Sydney, (2014), and the Australian University Teacher of the Year in 2017. Health Sciences Research Supervisor of the Year at the University of Sydney in 2018.

Deputy Editor of the Journal of Medical Imaging and Radiation Science, Past President of the Irish Institute of Radiography, Executive Board member of the European Federation of Radiographer Societies (RFRS), Vice President of the EFRS 2024-26, and President of EFRS 2026-28.

1. Degrees and Qualifications

2017: Senior Fellow Higher Education Academy (HEA)
2015: Graduate Certificate University Teaching (University of Sydney)
2013: Fellow of the Irish Institute of Radiography
2003: PhD Medicine (University College Dublin)
1998: BSc (Hons) Radiography (University of Ulster at Jordanstown)
1996: Certificate in Supervisory Management (Belfast Institute for Further and Higher Education)

2. Positions Held

	FROM	TO
Vice Head of Learning and Teaching, UCC College of Medicine and Health	2023	Present
Professor of Diagnostic Radiography, University College Cork	2019	Present
Honorary Professor, Faculty of Medicine and Health, University of Sydney	2019	Present
Adjunct Professor, University of South Denmark	2022	Present
Associate Dean, Student Life, Faculty of Medicine and Health, The University of Sydney	2018	2019
Associate Dean, Student Life, Faculty of Health Sciences, The University of Sydney	2017	2018
Academic Lead, Susan Wakil Health Building, The University of Sydney	2016	2019
Associate Professor, Medical Radiation Science, The University of Sydney	2014	2019
Honorary Reader, University of Salford	2015	2020
Faculty Director of Honours, The University of Sydney	2011	2014
Senior Lecturer, Medical Radiation Science, The University of Sydney	2011	2014
Lecturer, University College Dublin	2004	2011
Assistant Lecturer, University College Dublin	2000	2004
Radiographer, PACS Administrator - Mater Public Hospital	1998	2000

External appointments held:

2025-2030: External Examiner Hong Kong Metropolitan University
2024-26: Vice President of the European Federation of Radiographers Society
2023-2024 External Examiner BSc Radiography, University of Derby, UK
2022-25: Honorary Professor, the University of Sydney
2022: Adjunct Professor, Faculty of Health Sciences, University of South Denmark.
2022: Irish Research Radiation Oncology Group Cork Representative.
2022: Expert panel members for re-accreditation of the Faculty of Medicine University of Rijeka.
2022: External Accreditor to the European University of Cyprus, BSc Radiology and Radiation Therapy programme.
2019-22: Honorary Associate Professor, the University of Sydney
2018: Visiting Professor, Jordan University of Technology

2017: Visiting Expert, Department of Health, Sri Lanka,
2017: International Atomic Energy Association, Visiting Expert to Indonesia
2016: WHO Consultant to the Ministry of Health, Government of the Kingdom of Tonga, to carry out a scoping study of the radiography training program in Tonga
2015: Honorary Reader, University of Salford
2014: Singapore Ministry of Health, Manpower Development Plan (HMDP) - Visiting Expert 2014
2010-14: Europe-Africa Representative on the International Society of Radiographers and Radiological Technologists
2010-2012: Failte Ireland, International Conference Ambassador
2007-2011: Chair of the Registration Committee of the Health and Social Care Professions Council, Ireland
2007-2011: Appointed by the IIRRT to the inaugural Radiographers Board of the Health and Social Care Professionals Council of Ireland
2009-2011: Member of the Radiation Protection of Patients Unit, International Atomic Energy Agency (IAEA)
2009-2011: External Examiner, CT postgraduate course, University of Malta
2005-2009: External Examiner, University of Hertfordshire
2008-2011: Executive Member, Academic Staff Association, Irish Federations of University Teachers
2000-2009: Member and Chair of the Radiography Qualifications Review Board of the Irish Institute of Radiographers and Radiation Therapists (IIRRT)
006-2008: Member of Medical Radiation Accounts Committee, Radiation Protection Institute of Ireland
2008-2011: Health Service Executive Examination Board for nurse prescribing of ionising radiation education programme, Ireland

3. Management and Professional Experience

University College Cork Roles and Committees

- Vice Head of Teaching and Learning College of Medicine and Health Teaching and Curriculum Committee (2022- Present)
- CoMH representative on UCC's Institutional Review Group for QQI (2025)
- Chair of the School of Medicine Athena Swan Committee (2022- present). Achieeving the Schools first Bronze award.
- Member of Academic Council, UCC (2019-present)
- College of Medicine and Health representative of the Academic Council Graduate Studies Committee
- Lecturer Promotion and Establishment Board Committee member – 2020- 2023
- School of Medicine Executive Member 2020-present
- Course Director MSc Diagnostic Radiography, 2018-Present
- Course Director MSc Radiation Therapy, 2020-Present

- Head of Discipline Medical Imaging and Radiation Therapy2018-Present
- Member of College Council (COMH), 2018-Present

The University of Sydney, Roles and Committees

I held senior leadership roles at the University of Sydney, led significant faculty curriculum changes, and influenced policy across many portfolios.

The University of Sydney, Roles and Committees

- Associate Dean Student Life, Faculty of Medicine and Health (~16,000 students)
- Associate Dean Student Life, Faculty of Health Sciences (~6,000 students)
- Academic Lead, Camperdown Health Precinct. In this role, leading the move of three Faculties to a new building on a new campus.
- Leader of the Medical Imaging Optimisation and Perception Group (MIOPeG) Faculty Research Group, 2017
- Chair of the Central Design Working Group on Enabling Technologies 2016-2019
- Chair of the Local Project Working Group on Specialist Teaching Spaces 2016 -2019
- Representative on Senior Executive Group, education November 2016
- Academic Board member, 2016-2019
- Faculty of Health Sciences, Director of Honours programs, 2011-14
- Faculty of Health Sciences, Space Allocation Committee, 2012-13
- Faculty of Health Sciences, Teaching and Learning Committee, 2011-2019 [Occasional Chair]
- Faculty of Health Sciences, Teaching and Learning Executive 2011-14
- Faculty of Health Sciences, Research Higher Degrees Committee, staff representative 2011-14
- Faculty of Health Sciences, Student Leadership Awards Committee 2012
- The University of Sydney, Member of the Academic Board Working Party on Honours-awards 2012
- Medical Radiation Science, Curriculum Review Committee 2011-14
- Medical Image Optimisation and Perception, FRG. Leader of the Image Acquisition Group 2014-19
- Breast Cancer Special Interest Group, Member, 2012-2019
- Cancer Research Network, 2011-2019
- Academic Performance and Development Mentor, 3x Level A; 1 x Level B
- Research Higher Degree (RHD) Annual Progress Review, Chair x 10+ and Reviewer x10+

University College Dublin, Roles and Committees

- 2004-2011 School of Medicine and Medical Science, Undergraduate Programme Board, Member and Stage 1 Coordinator
- 2009-2011 University Academic Council Assessment Appeals Sub-Committee, Member
- 2007-2011 School of Medicine and Medical Science Staff-Student Committee, Chair
- 2006 - 2009 School of Medicine and Medical Science Teaching and Learning Committee
- 2008-2011 School of Medicine and Medical Science Postgraduate Taught Programmes Board

4. Research Outputs

Research Supervision [For details, see Appendix 1]

I have supervised multiple Higher Degree Research (PhD and MSc) since 2005 and have successfully translated research into publications and transitioned PhD graduates into research careers. My supervision overview is as follows:

Research Publications [For details, see Appendix 2]

Conference Contributions

Strong public speaker of international reputation. I have had 220+ National and International Conference Presentations and Publications, 5 International Invited Presentations, and numerous international conference contributions as an international conference convener, conference chair, session chair, conference committee member, and multiple keynote speaker engagements. My conference contributions include:

- 2024: ECR research presentation award in the Radiographers programme for AI identity study
- 2024: ECR Radiographer Conference organising committee
- 2023: ECR Radiographer Conference organising committee
- 2022: ECR Session Chair
- 2022: Medical Image perception Conference, Co-convenor, York, UK
- 2011-Present. SPIE Image Optimisation Perception and Technology Assessment, Conference Session Chair, (2011, 2012, 2013) San Diego, CA 2014, 2012; Orlando FL, 2013, 2011
- 2010 –Present. SPIE conference committee member
- 2011. Medical Image Perception Society, Chair and Convener, Dublin, IRL
- 2012. ASMIRRT Conference Session Chair x 3, Sydney, AU
- 2007. Opening Presidential Address. *11th Annual Conference of the Irish Institute of Radiography and Radiation Therapy*
- 2006. Opening Presidential Address. *The 10th Annual Conference of the Irish Institute of Radiography and Radiation Therapy*

I have presented at international conferences globally, including the Radiological Society of North America and the European Congress of Radiology, as well as in Australia, Canada, the UK, Indonesia, Singapore, Slovenia, Portugal, and many more

Summary of previous years' number of presentations: 2025 (10), 2024 (14), 2023 (11), 2022 (21), 2021 (3), 2020 (4) (2019 (9); 2018 (5); 2017 (3); 2016 (4); 2015 (9); 2014 (6); 2013 (13); 2012 (11); 2011 (8) 2010 (5); 2009 (14); 2008 (8); 2007 (6); 2006 (6); 2005-2001 (18).

- McEntee 2025: Singapore Radiology conference Key note
- McEntee, 2024: Keynote speaker, Total Radiology, Bangkok, - Toward leadership in Medical Imaging and radiation Therapy.
- McEntee 2019: Keynote speaker, trauma study day Cork University Hospital.
- McEntee 2018: Keynote Speaker, Jordan University of Technology Annual Conference
- McEntee 2017: Keynote Speaker, KDU Does Dose Matter http://ir.kdu.ac.lk/handle/345/1630 10th Annual International Research Conference of General Sir John Kotelawala Defence University, Sri Lanka organised under the "Changing Dynamics in the Global Environment: Challenges and Opportunities" on 3rd and 4th August 2017. Columbo, Sri Lanka.
- McEntee 2016: Keynote Speaker, The Annual Conference of the Society of Radiographers in Indonesia, Bali
- McEntee MF (2014): social media in clinical education, Clinteach 2014, University of Sydney
- McEntee (2014): Technology That Works - Engaging Students Using Active Learning Facilitated by Technology Workshop at the Australian Conference for Science and Mathematics Education, University of Technology, Sydney
- McEntee (2011): Aunt Minnie Webinar - The future of hand-held devices, International Simulcast
- McEntee MF (2010): The Role of Research in Radiography Development, Coimbra, Portugal
- McEntee MF (2010): Statutory registration for Radiation Therapists under the Health and Social Care Professionals (HSCO) Act 2005, The 10th Annual All-Ireland Radiation Therapists Study Day, Dublin, Ireland
- McEntee MF (2009): Keynote Lecture - Professional development driven through Research, Slovenian Congress of Radiography, Lubjiana, Slovenia
- McEntee MF (2008): Research Opportunities [Invited Lecture], MR Users Group/ Imaging and PPCE Meeting, Faculty of Radiologists, RCSI, Belfast, Northern Ireland.

6. Competitive Grants Won

I have been awarded $3,5Min research funding. This has supported projects as diverse as improving the attendance of Indigenous Australian women at breast screening and improving the detection of cancer by radiologists. The highlights are below; full details are in Appendix 1.

- Education grants (cumulative 2012-present) $168, 392.
- Cancer Institute NSW, e16/ 14264. Improving screening activity and participation rates amongst Aboriginal and Torres Strait Islander women. Mark McEntee, Vanessa Lee, 2015-17, $195,244
- A mobile imaging platform to further transform breast cancer imaging research in NSW initiated by BREAST. 13/REG/1–to06 PC Brennan, S Grieve, M McEntee, C Mello-Thoms, X Yi, CIB, 2013-14, $417,524

Awarding Authority	**Project Title**	**Members**	**Role**	**Duration of Award**	**Total Amount**
European Cooperation in Science and Technology (COST)	ENRICH (European Network for radiation-detection based Research and Innovation COST Action CA24131	Dr Alessandro Scordo et al.	Management Committee	2025-2029	134.000 EUR per year
UCC SATLE	AI-ntegrity: The Future of Assessments Survey	Marie Ryan … McEntee et al.	Co-applicant	2024-5	€1,296.18
EIBIR	Sustainable Iodine Contrast Media for a Healthy Future (SUSTAINED)	Andrew England, Mark McEntee	Co-I	2 years	€7000
Health Research Board - Applied Programme Award	Educating Healthcare Professionals for Climate Change Resilient and Sustainable Healthcare Systems.	Professor Deirdre Bennett, Andree Rochfort, Anel Wiese, Niamh Coakley, Debbi Stanistreet, Marguerite Nyhan, Chris Lynch, Aoife Fleming, Elaine Lehane, Mark McEntee, Dr. Orla Healy, Geoghegan, Rosemary, Bernadette Rock, Cooke, John, Harsha Daswani, Diarmuid O'Donovan, Vivienne Crawford, Stefi Barna, Leedham-Green, Kay, Cathy Burke, Philip Crowley, Darren Dahly	Co-applicant	2-24-2028	€2,475,908
General Electric Health Care	Rapid Enhanced Assessment of Lung Cancer (REAL Ca)	Micheal Maher, Andrew England, Niamh Moore	CIA	2023-2-24	€77,519
UCC - SATLE	INCLUDE: Mapping Inclusion in Health Professions' Education	Dr Margaret Bermingham, Angela Fynn, … McEntee etal	Co-applicant	2023-24	€25,461
College of Radiographers Industry Partnership Scheme (CoRIPS	R-**AI**-diographers: Exploring the changing professional role and identity of radiographers in Europe in the era of AI	Christina Malamateniou Yiannis Kyratsis, Mark McEntee	CI	2022-24	£16,170

Enterprise Ireland Coordinator Support CS20221415	Digital diagnostics – developing tools for supporting clinical decisions by integrating various diagnostic data	McEntee, Mark; Sa Dos Res, Bezzina, Riberio, Malamateniou, Paulo, Mekis, Knapp, Prect, McNulty, Moore, O'Donovan, Young, Devine et al.	CIA	2022	€4000
HRB	UCC Symposium on Cutting Edge Computed Tomography (CT)CES-2022-017	A. England, MF McEntee	CI	2022-23	€4,947.08
College of Radiographers Industry Partnership Scheme (CoRIPS)	Black box no more: identifying the knowledge needed to understand regulation and guide procurement of AI in Radiography	Mark McEntee, Christina Malamateniou	CI	2022-23	11,300GBP
Enterprise Ireland Coordinator Support CS-2021-0947	Digital diagnostics – developing tools for supporting clinical decisions by integrating various diagnostic data	McEntee, Mark; Sa Dos Res, Bezzina, Riberio, Malamateniou, Paulo, Mekis, Knapp, Prect, McNulty, Moore, O'Donovan, Young, Devine et al.	CIA	2020	€11,434
Haute Ecole de Santé Vaud | Lausanne, Switzerland | HESAV	Internationalisation at home: Ultrasound	Ricardo Teresa Ribeiro Cláudia Sá dos Reis, Laurence Flaction, Mark McEntee, Cosmin Campeanu, Nabi Tobish	CI	5 years, annually	50,000 SFR
College of Radiographers Industry Partnership Scheme (CoRIPS	Assessing the Impact of Covid 19 on Radiography Academics and Researchers: A Mixed Methods, Exploratory, World-Wide Study	Christina Malamateniou, Mark McEntee	CIA	2020-2021 year	£10,800.00
Enterprise Ireland 1007 Enterprise Ireland_H2020 CS 2020-0744_Radiography	Digital diagnostics – developing tools for supporting clinical decisions by integrating various diagnostic data	McEntee, Mark; OJ O'Connor, Joyce, Stella, O'Driscoll, Jessica; Scally Andrew; Moore, Niamh; Young, Rena; Maher, Micheal.	CIA	2020	€12,500
DVC Education/Large Educational Innovation Grant. The University of Sydney	MOOC on Life, Health and Radiation	Mark McEntee, Peter Kench, Patrick Brennan	CIA	2017-2018	$35,000
Australian Society of Medical Imaging and Radiation Therapy	The translation of research findings into evidence-based practise within diagnostic radiography in Australia	Laura Di Michele, Warren Reed, Belinda Kenny, Mark McEntee	CID	2017-2021	$10,000

Funding	radiation therapy	Atyeo, Peter Thomas			
DVC Education/Large Educational Innovation Grant. The University of Sydney. **USYDEIG2016** 16060	eHealthMap: a collaborative core curriculum and resource repository for eHealth readiness across health professional degrees	*Tim Shaw, Leanne Togher, Mark McEntee…, Anna Janssen, Graham Mann*	CIE	2016-17	$33,380
DVC Education/Large Educational Innovation Grant. The University of Sydney.**USYDEIG2016** 16108	Radiological anatomy and pathology of the chest	Mark McEntee, Jennifer Allison, Stephen Littlefair, Vanessa Hughes	CIA	2016-17	$28,200
Cancer Institute NSW **e16/ 14264**	Improving screening activity and participation rates amongst Aboriginal and Torres Strait Islander women	Mark McEntee, Vanessa Lee	CIA	2015-17	$195,244
DVC Education/small Educational Innovation Grant. The University of Sydney	Enhancing access, feedback and learning: A 1-scroll solution to delivering media-rich educational resources in Health Sciences	Mark McEntee, Sarah Lewis, Warren Reed	CIA	2015-6	$8,000
University of Salford Innovation Awards	A web-based training and assessment package for mammography breast density assessment	Mark McEntee, Peter Hogg	CIA	2015	£5,000
ANZSNM	Diagnostic Reference Levels for Patients Undergoing PET/CT scans in Australia and New Zealand	Peter L Kench, Essam MA Alkhybari, Kathy Willowson, Mark McEntee	CIB	2015-17	$20,000
DVC Education/small. Educational Innovation Grant. The University of Sydney	*Flipping the classroom in the Faculty of Health Sciences*	McEntee, Cailliaud, Che Fornusek	CIA	2014-15	$8,000
Cancer Institute of NSW **13/REG/1–to06**	A mobile imaging platform to further transform breast cancer imaging research in NSW initiated by BREAST	PC Brennan, S Grieve, M McEntee, C Mello-Thoms, X Yi	CIC	2013-16	$417,524
Faculty of Health Sciences Collaborative Research Scheme 2014, The University of Sydney	Interdisciplinary e-Health Advancement and Research Team (IeHART).	Togher, L., Shaw, T., Lam, M., Poon, S., Campbell, A., Dew, A., Lowe, R., McEntee, M., et al. (2014-2015).		2014-16	$39,709
Widening Participation Grant. Implementation Project. The University of Sydney	Widening Participation funds to *The Belong@FHS Journey: Peer Mentoring Across the Undergraduate Lifecycle*	Sarah Lewis, X Luu; M Nguyen; C Caillaud; T Barclay; M McEntee; N Wedgwood; D Shirley	CIB	2013-14	$25,812
Apps4NSW	Emergency Departments NSW: An app for patients in emergencies	McEntee	CIA	2012	$500
Institute for Teaching and Learning, Learning Spaces	Map my PhD	McEntee, Charles &Bourne	CIA	2013	$20,000

for Engaged Enquiry project. The University of Sydney,					
Widening Participation Grant. Implementation Project. The University of Sydney,	Belong@FHS: Implementing a Faculty-Wide Peer Mentoring Scheme for Health Sciences Students	Ngyuen, Lewis, McEntee, Lincoln	CIC	2012-13	$20,000
International Professional Development Fund. The University of Sydney	The development of a research network for radiographic perception in architectural distortion	McEntee	CIA	2012-14	$22,000
Schlumberger Foundation Fellowship	Exposure parameters in tomosynthesis	Damases, McEntee Brennan,	CIB	2012-13	$50, 000
National Institutes of Health NIH, USA	Medical Image Perception, conference	McEntee, Krupinski	CIA	2010-11	$10,000
Widening participation grant, The University of Sydney	1st-year experience	Lewis, McEntee, Ngyuen, Lincoln	CIB	2011-12	$13,020
Widening participation grant, The University of Sydney	Research engaged learning and teaching	Lewis, McEntee, Ngyuen, Lincoln	CIB	2011-12	$13,020
Bord Failte, Ireland	Conference ambassador	McEntee	CIA	2010-11	€5,000
Health Research Board of Ireland	Optimisation of perception in mammography	McEntee, Brennan	CIA	2010-13	€239,050
Health Service Executive of Ireland	Professional Development Fund, education and research	McEntee	CIA	2007-09	€98,457
Irish Research Council for Science Engineering and Technology (IRCSET) PhD Student Scholarship	Reduction of doses in MSK radiography	Kinsella McEntee,	CIA	2009-12	€72,000
EIZO Corp.	The use of 5 MP monitors in mammography	Brennan, McEntee	CIB	2006-07	€5,000
School of Medicine and Medical Science Research equipment scheme. University College Dublin		McEntee	CIA	2007-08	€3,000
American Board of Radiology Research contribution	Travel grants for ongoing image perception collaboration	McEntee, Brennan	CA	2005-Present	€30,000
Seed funding scheme. University College Dublin	The impact of education on the perception of radiological features.	McEntee	CIA	2006-09	€14,320
Irish Research Council for Science Engineering and Technology (IRCSET) PhD Student Scholarship	Novel display devices for radiology	Toomey, McEntee	CIB	2006-10	€72,000

Irish Institute of Radiography, PhD Scholarship	Professional development of radiographers	McEntee, Lowe,	CIA	2005-09	€2,000
Health Research Board of Ireland,	Student Summer Scholarship	Foley, Coffey, McEntee	CIA	2004-05	€1,280
Academic publications scheme. University College Dublin	Funding for the development of a reference text for radiographers			2003	€1,250
Cross Border Collaboration Grant, UK	Development of cross border research collaborations		CIB	2001	£3,140

7. Teaching

Teaching Philosophy

My teaching philosophy is one of engaged enquiry that puts student learning at the centre of every lesson, respecting that learning is a very individual experience and that there are many learning styles. I believe that students can arrive at understanding from different directions and that this can be facilitated more effectively where there is a structured learning process. My Australian Award for University Teaching recognised the "enabling of student enquiry in diagnostic imaging through an innovative, media-rich learning environment that provides multi-stage feedback on learning activities".

I predominantly use engaged enquiry as a catalyst for student learning because learning is a very individual experience and engaged enquiry facilitates many learning styles. My engaged enquiry is enabled by technology and structure to make learning enjoyable. The principles are:

- Maximising the use of technology to engage students in learning.
- Providing a structure for engaged enquiry that promotes deeper learning.
- Making learning enjoyable through my teaching style and using extended group work.

Teaching Responsibilities

Current

- I am the head of teaching and learning in across the College of Medicine and Health. This role includes responsibility for the quality and standards of teaching, curriculum and assessment across the college Comprising of six Schools, the College of Medicine and Health provides future medical and healthcare professionals with a world-class, student-centred education based on knowledge, informed by research and with an awareness of societal needs.
- I am the course director for the MSc Diagnostic Radiography and MSc Radiation Therapy at UCC; I am the module coordinator for five modules across both programmes.

Past

- As Academic Lead for the Camperdown Health Precinct at the University of Sydney, I collaborated with the leaders of the design user groups to ensure the building was designed with world-class pedagogy in mind.
- As Associate Dean of Student Life, I was responsible for the student experience in all issues outside the curriculum, from orientation to counselling and psychological services and beyond to Alumni mentoring.

- As a teacher, I have coordinated 100s of units of study on almost all aspects of Diagnostic Radiography from technique to practice in three universities.

8. Fellowships, Professional Memberships and Contributions to Professional Associations

Fellowships, Honours & Awards

2025: President Learning and teaching award, Established Career, UCC
2024: President's Award for Excellence in Teaching – Established Career (Team award) Several team members were involved. Niamh Moore, Rena Young, Prof Mark McEntee, Annmarie Devine
2024: Society and College of Radiographers Patient Voice Award of the Society of Radiographers, City of London University, Patient-centred care module.
2024: Radiography –most cited paper. Rainford et al. (2021). The impact of COVID-19 upon student radiographers and clinical training. Radiography, Volume 27, Issue 2.
2024: ECR research presentation award in the Radiographers programme for AI identity study
2023: #3 most downloaded article in 2023; Coakley S, et al. (2022). Radiographers' knowledge, attitudes and expectations of artificial intelligence in medical imaging. Radiography, Volume 28, Issue 4.
2022: Nominee for the Aunt Minnie, Europe's most influential radiographer 2022
2019: Radiography Editor's Choice. Awarded best paper
2018: FHS Teaching Award for Outstanding HDR Supervision.
2017: Sydney University Postgraduate Representative Association, Supervisor of the Year and award for Outstanding Support of Student Wellbeing
2017: Australian Government Department of Education and Training, National Award for Excellence in University Teaching
2017: Senior Fellow, Higher Education Academy
2015: *Radiography* Editor's Choice. Awarded to the Editorial Committee's choice of the best paper
2015: The Annual Singhealth Publish Award (Medical Research)
2014: Vice-Chancellor's Award for Outstanding Teaching (USYD)
2013: Faculty of Health Sciences Outstanding Teaching Award (USYD)
2013: FIIRRT, Fellowship of the Irish Institute of Radiography and Radiation Therapy
2012: Best Scientific Paper Presentation Award in the European Congress of Radiology
2012: Apps4 NSW People's Choice Award, Runner Up
2011: Kate Matthews Medal: Best publication resulting from an Honours project
2010: School of Medicine and Medical Science (UCD), Teacher of the Year Award
2010: Kate Matthews Medal: Best publication resulting from an Honours project

2009: School of Medicine and Medical Science (UCD), Teacher of the Year Award
2009: Royal College of Radiologists, Edward Malone Medal for Best Oral Presentation
2009. Winner - Health Research Board Summer Scholars' Poster Competition
2008: College of Life Sciences Teaching Award (UCD), in recognition of contribution to education

Professional Associations

I have significant roles with national and international scientific committees and professional associations.

2024-2026: Vice President of the European Federation of Radiography societies.
2021-2024 European Federation of Radiographer Societies Research Committee Member
2020-Present European Federation of Radiographer Societies Education Wing elected Committee Member
2020 CORU Ireland Registered Radiographer RA038575
2018-Present Associate Member of the European Congress of Radiology
2016-2020 Radiological Society of North America (RSNA), Member of the Physics Subcommittee of the Education Exhibits Committee
2015-Present Secretary of the Medical Image Perception Society (MIPS)
2016-Present Associate Member of the ISRRT
2007-2014 Member of the Medical Image Perception Society (MIPS)
2013-2019 National Tertiary Education Union Member
2006-2008 President of the Irish Institute of Radiography and Radiation Therapy (Professional Body)
2004-2006 Vice President of the Irish Institute of Radiography and Radiation Therapy (Professional Body)
2007-2011 Inaugural Council Member of the Health and Social Care Professions Council (Legislated Statutory Body, Ireland)
2011 Executive Member and Conference Organiser, Medical Image Perception Society 2006-Present Member of the Society of Photographic Instrumentation Engineers (SPIE)
2009-Present Committee Member of the Image Perception, Observer Performance and Technology Assessment Conference of SPIE Medical Imaging
2005-2010 Member of the Academic Staff Association of the Irish Federation of University Teachers (IFUT)
2006-09 External Examiner to the BSc Radiography Programmes, University of Hertfordshire (UK)

9. Contributions to my Academic Field

I am currently the Deputy Editor of the Journal of Medical Imaging and Radiation Science (Canada). I review for more than 10+ medical journals, including the PLOS ONE, Australasian Physical & Engineering Sciences in Medicine, Australian Critical Care, British Medical Journal, The British Journal of Radiology, Medical Physics, Journal of Digital

Imaging, and Radiography. I was Editor-in-Chief for Radiography Ireland (2006-2011). I chaired grant-awarding committees, including the Educational Innovation Grants Committee at the University of Sydney and the Irish Institute of Radiography Research Award. I have reviewed grants for the Health Research Board of Ireland, the Dutch Cancer Society (KWF Kankerbestrijding) and the Cancer Research UK population research committee.

Deputy Editor

1. The Journal of Medical Imaging and Radiation Sciences (2020-2024)

Associate Editor

2. Radiography (2006-2021; Guest editor (2019-2020)
3. BMC Medical Imaging (2010-2018)
4. The Journal of Medical Imaging and Radiation Sciences (2017-2020)

Reviewer

1. Radiography (UK), editorial board, Reviewer 2006-present
2. Journal of Medical Imaging and Radiation Sciences (Canada), editorial board, REVIEWER 2009-present
3. PLOS One
4. Australian critical care (AU), Reviewer 2015 - present
5. Medical Physics (USA), Reviewer
6. The British Journal of Radiology (UK), Reviewer 2007-present
7. British Medical Journal, (UK) Reviewer
8. Journal of Telemedicine and Telecare, (USA) Reviewer
9. Radiography Ireland (Editor-in-chief), Editor-in-chief, 14-SEP-05 to 09-JAN-08
10. European Journal of Radiography (Holland), Reviewer 2009-present
11. The Journal of Digital Imaging (USA), Reviewer 2010- present
12. The Journal of Medical Radiation Sciences (AUS), Reviewer, 2013- present
13. Displays, Reviewer, 2013- present
14. Australasian Physical & Engineering Sciences in Medicine, Reviewer 2015- present
15. Attention, Perception and Psychophysics; Reviewer 2015 – present
16. Academic Radiology
17. Computers in Biology and Medicine
18. Physica Medica: European Journal of Medical Physics
19. Journal of Patient Experience
20. Cognitive Research: Principles and Implications

APPENDIX 1: Research Higher Degree SUPERVISION

My PhD students and my research with them also exemplify my research interests. I have supervised over 22 PhDs and 6 MSc to completion. They are as follows:

1. Abdulaziz ALSHABIBI – (PhD USyd) – Associate Supervisor. · Factors Causing Variability when Reading Mammography
2. Laura Di Michelle (PhD USyd) – Associate Supervisor. Change Management models in Radiography
3. Dr HADADI, IBRAHIM (PhD, USYD)– Associate Supervisor – Supplementary imaging for dense breasts.
4. Idris Garba, Doctor of Philosophy (PhD University of Malta, Associate Supervisor).
    a. Adult radiation doses for head, chest and abdominal CT examinations: optimisation establishment of diagnostic reference levels in the northwest region of Nigeria. (Awarded MPhil)
5. Rhonda-Joy Sweeney (PhD USyd) – Associate Supervisor.
    a. Image quality criteria for Digital Mammography, an international Delphi study.
6. Essam Mohammed A Alkhybari (PhD USyd) – Associate Supervisor.
    a. Diagnostic Reference levels in PET CT
7. Kriscia Tapia (PhD USyd) – Associate Supervisor.
    a. Mammographic density and morphology within Australian Indigenous women
8. Mariaulpa Binti SAHALAN (PhD USyd) – Associate supervisor.
9. Ali Alhaily (PhD USyd) – Primary Supervisor. Dose Optimisation Establishment of Diagnostic Reference Levels in Cardiac Computed Tomography Angiography.
    a. This thesis has established DRLs for CCTA in Saudi Arabia and Australia and shows that DRLs in both countries are comparable to or even lower than DRLs in published studies. Additionally, considerable variations remain in median doses between CT centres for the most frequently used CCTA protocols. The causal factors for dose variation found in this thesis are scanning mode, kV, padding time technique and CSA of the chest. Results from this thesis indicate the potential for DRLs to prompt dose optimisation strategies in CT facilities.
10. Moe Sulieman (PhD USyd) – Primary Supervisor. Diagnostic Reference Levels in Digital Mammography
    a. This thesis has recommended DRLs for mammography in Australia and shows that MGD depends on compressed breast thickness and detector technology. The work also shows wide variation in Organ Dose and dose calculation methodologies across mammography vendors. Organ doses reported by vendors vary from that calculated using established procedures. Data produced also show that using MGD calculated using standardised glandularities underestimates radiation risk. Finally, AGD was proposed; it considers differences in breast composition for individualised radiation-induced risk assessment
11. Kamarul Abdullah (PhD USyd) – Primary and Associate Supervisor (2018). Optimisation of radiation dose and evaluation of diagnostic image quality in coronary CT angiography and myocardial perfusion imaging
    a. The 3D printing technology was used to produce a novel design of a cardiac insert phantom for the Lungman phantom. The 3D-printed cardiac insert phantom can be used to evaluate the effect of using the IR algorithm on dose reduction and image quality. The dose optimisation assessment using the phantom method demonstrated a combination of IR algorithm and low tube voltage could further reduce the radiation dose to the patient while maintaining the image quality. This thesis proposes and validates a new method of developing phantoms for CCTA dose optimisation studies
12. Ned Charles (PhD USyd) – Primary and Associate Supervisor (2017)
    a. Diffusion imaging of prostate and breast cancer
    b. This demonstration established that a model selection method declaring a model as best does not automatically translate into better accuracy and precision of parameters. Therefore, extra caution must be taken when using model selection methods to make inferences about complex models since their tendency to overfit leads to a lack of generalisation. So, while the simple mono-exponential ADC value does not accurately describe underlying restrictions to tissue, giving considerable bias to its diffusion coefficient estimates, its simple structure makes it more robust to noise and algorithmic issues than the biexponential or kurtosis models.
13. Christine Damases (PhD USyd) – Primary Supervisor (2016)

   a. Causal factors and potential clinical implications of variation in mammographic density assessment
   b. Assessing radiation risk in breast tomosynthesis. This work demonstrates that expert radiologists differ in their MD assessment on a 4-point scale and less on a binary scale. Reduction in the variability of MD assessment may require a widely acceptable, reproducible, and accurate evaluation method. However, MD measurements with automated processes eliminate subjectivity and are more reproducible than visual assessment methods. Due to the increasing importance of MD measurement in the clinical management of patients, automated methods are recommended to avoid unnecessary variations.

14. Ernest Ekpo (PhD USyd) – Primary Supervisor (2016)
   a. Measurement of Breast Density with Digital Mammography and Tomosynthesis
   b. Overall, BI-RADS® inter-reader agreement in BD assessment is better on a two-grade scale than on a four-grade scale. QuantraTM BD measures from DM reflect 4th edition BI-RADS®, and measures from DBT reflect 5th edition BI-RADS® ratings on a two-grade scale. EIZO RX850 has equal to or better performance characteristics than the Barco MDCG 5121 and EIZO GS510 displays. Data produced should help tailor clinical decisions from BD to improve women's health, educate healthcare managers about these novel tools and facilitate better decision-making regarding their clinical implementation.
15. Wasfi Sulieman (PhD USyd) – Primary Supervisor (2016)
   a. Observer Performance Factors Influencing Breast Cancer Detection in Mammography
   b. The findings show that an increased number of mammographic cases read per year increases readers' sensitivity and that AD detection remains challenging to diagnose. Improvements were shown in the diagnostic performance of radiologists undertaking the BREAST test-set reading program over three years. Finally, it has demonstrated that carefully constructed test sets for education can improve lesion detection with DM in test-set conditions.
16. Aritrick Chatterjee (PhD USyd) – Primary and Associate Supervisor (2015)
   Redefining the biophysical basis of contrast in diffusion-weighted MRI of the prostate
   a. Partial volumes of epithelium, stroma, and lumen space show stronger correlations with Gleason grades than the "cellularity" metrics nuclear count and nuclear area. Using diffusivities measured in fixed tissue, changes in partial volumes of low-diffusivity epithelium, intermediate-diffusivity stroma, and high-diffusivity lumen space predict ~60% of the difference observed in vivo between normal tissue and Gleason patterns 3-5.
17. Dr Joanna Santos, (PhD UCD) – Primary and Associate Supervisor (2014)
   a. Joanna is from the University of Coimbra, Portugal and studied Diagnostic Reference Levels for Paediatric CT
18. Dr Pauline Boh Lin Soh (PhD USyd) – Associate Supervisor (2014)
   a. Pauline researched the effect of the experimental environment on radiologists' performance in mammography.
19. Dr Frankie Zarb, Doctor of Philosophy (PhD UCD) – Primary and Associate Supervisor (2013)
   a. Frankie undertook a significant project to establish the dose reference levels (DRLs) for CT in Malta. His published work discussed DRLs concerning computerised tomography (CT) and their role in standardising and auditing radiation doses in CT.
20. Dr Shane Foley, Doctor of Philosophy (PhD UCD) – Primary and Associate Supervisor (2013)
   a. Shane's work looked at novel ways to reduce doses to the Breast during cardiac CT and investigate the Collective dose from CT examinations in Ireland.
21. Dr John Stowe (PhD UCD) – Primary Supervisory (2014). CT beam hardening correction.
22. Dr Maria Joyce, Doctor of Philosophy (PhD) – Primary and Associate Supervisor (2011)
   a. Maria's work aimed to investigate the current evidence for SID as an optimisation tool in radiography to determine the exact mechanism or extent of dose reductions with increasing SID. The research was carried out to conclude whether increasing SID reduces effective doses definitively and, if so, can this dose reduction can be applied to all radiographic projections on modern digital receptors.
23. Dr Rachel Toomey, Doctor of Philosophy (PhD, UCD) - Primary Supervisor (2010)
   a. Rachel examined novel display devices, including PDAs, iPhones and new surfaces on LCDs for Diagnostic Imaging. This study sought to determine whether hand-held computing devices could provide diagnostic accuracy comparable to that of secondary display monitors, which might be used in emergency teleconsultation. It also looked at faceplate characteristics intended to diffuse ambient light incidents on the monitor that may also diffuse the image signal.

The 6 Masters Completions were:

1. David Reidy (MSc) – Primary Supervisor

His study aimed to investigate the effect of kVp and the anti-scatter grid on effective doses and image quality of posteroanterior chest radiographs with simulated pathology and ROC analysis. A phantom study.

2. Mary Conlon (MSc) – Primary Supervisor

Investigated the effect of scanned requests on workflow within the digital department. This study investigated the impact of outsourced transcription, paper request scanning and voice recognition on report turnaround times (RTAT) in a radiology department over three years.

3. Ciara Ni Laighin (MSc) – Primary Supervisor

Investigated obstetric ultrasound referral criteria for Small Gestational Age (SGA) fetuses.

4. Cherrie Wade (MSc) – Primary Supervisor

Investigated quality assurance regimes for soft copy monitors. This study examined the performance of a selection (n=33) of cathode ray tube monitors used in radiology. Previously published quality assurance tests and standards were used and evaluated, and the data provided was used to determine the utility of each test. Recommendations for a program of consistency analysis suitable for imaging departments using cathode ray tube devices were made.

5. Patrick Doherty (MSc) – Primary Supervisor

Investigated the optimisation of the radiography of the paediatric pelvis through the use of kVp and copper filtration. The purpose of the study was to ascertain optimal exposure parameters, kVp and level of copper filtration that should be employed for this 1, 5 and 10-year-old paediatric examination using Computed Radiography and Direct Digital Radiography modalities. This study also aimed to determine whether current European recommendations when applicable to digital X-ray modalities such as CR and DR.

6. Connor Clancy (MSc) – Advisor

This was a collaborative work with the University of Dublin (Trinity). Connor investigated the effect of the placement of lead rubber on an anthropomorphic phantom and the effects of effective and organ dose on the patient. This study aimed to remove some ambiguity by defining the optimal method of positioning patient shielding in anteroposterior (AP) and lateral lumbar spine radiographic examinations. These examinations were chosen based on (1) their proximity to the reproductive organs and (2) the fact that they represent the highest collective population dose of any conventional radiographic examination carried out in the UK.

My current higher degree by research students includes four in Sydney and three in UCC

1. Ibrahem Kantabi – (PhD USyd) – Associate Supervisor. · mammographic density phenotypes
2. Brian Evans – PhD (USYD) – Associate Supervisor. CT guided Biopsy.
3. Niamh Moore (PhD UCC) – Primary Supervisor, Ultra-low dose CT imaging
4. Peter Murphy (PhD UCC) · Primary Supervisor – AI measurement of Breast density in MRI
5. Theresa O'Donovan (PhD UCC) · Primary Supervisor – Weight Bias in Radiation Therapy
6. Ahmed Toktah (PhD UCC) · Primary Supervisor – CT imaging of Suspected Physical abuse
7. Yasser Hadi (PhD UCC) · Primary Supervisor – Automatic position in CT
8. Zuhura Fadhili Nkrumbih (PhD UCC) · Primary Supervisor – Correlation between Mammographic and pathologic findings of Breast cancer
9. Momen Mohammad Hasan Bani-Ahmad (PhD UCC) · Primary Supervisor – AI optimisation of CT
10. Olushola David Adebayo (PhD UCC) · Primary Supervisor – Radiomics in neuriradiology
11. Helen Nwokoye (PhD UCC) – Secondary supervisor – CBCT in Dental Radiography

Examination of RHD Theses

I have been the Examiner of 2 master's level theses and 7 PhD theses.

At PhD Level

1. Al Khalaf, Sukainah (PhD UCC) Independent chair 2022. The impact of maternal chronic hypertension and chronic kidney disease on the risk of adverse pregnancy outcome and long-term cardiovascular disease: A population-based epidemiology study.
2. Florence Elizabeth Davidson, (PhD Cape Peninsula University of Technology) 2020. Body fat distribution and cardio-metabolic risk factors in South African men and women.
3. Kavitha Krishnan (PhD, The University of Melbourne) *This research found that, for women of the same age and body mass index, those with greater mammographic density are at greater risk of breast cancers that are larger and more likely to have lymph node involvement, and if affected, at greater risk of recurrence. Women with a greater percentage of mammographic density are at greater risk of having tumours masked on a mammogram and, consequently, a delayed diagnosis. These mammographic density measures are highly stable over time from early adulthood.*
4. Charbel Saade (PhD, University of Sydney): 2014 An optimised patient-specific contrast formula based on cardiovascular dynamics improves vascular visualisation during computed tomography angiography.
5. Warren Reed (PhD, University of Sydney). 2011. The effect of prevalence in mammography.
6. Karen Dobeli (PhD, University of Sydney). 2013.
7. Sonia Mc Fadden (PhD, University of Ulster): 2010. Dose Optimisation in Paediatric interventional cardiology.

At master's Level

8. Ann O Loughlin (MSc, UCD): (2005) A viable alternative to the Swimmer's projection in trauma radiography of the cervicothoracic spine.
9. Elaine Carroll, (MSc, UCD): (2003) 'Radiation doses for barium enema and barium meal examinations in Ireland: potential diagnostic reference levels'

APPENDIX 2: Publications

Publications: Summary of previous years journal papers: 2026 (3); 2025 (23); 2024 (31), 2023 (18) 2022 (17), 2021(13), 2020 (13) 2019 (12) 2018 (12); 2017 (10); 2016 (27); 2015 (15); 2014 (19); 2013 (11); 2012 (8); 2011 (11); 2010 (14); 2009 (9); 2008 (7); 2007 (9); 2006- 2001 (17). Book chapters (6). ECR Conference publications (15)

Books Edited

1. Seeram, Davidson, England and McEntee (2022) *Research for Medical Imaging and Radiation Sciences*. Springer Nature Switzerland AG 2021: Springer, Cham. Edition 1st. ISBN / ISSN 978-3-030-79956-4.
