Rebeca Vaz Queiroz, PhD

Clinical Researcher | Digital Health Evidence | AI in Oral Health

Portugal | rebeca.vaz@voithy.com | +351 938 927 335

ORCID: 0000-0002-0384-7931 | CIÊNCIA ID: 3C1A-B652-96AC | CNPq Lattes: profile

EXECUTIVE PROFILE

Clinical researcher with a PhD and MSc in Health Sciences and a background in Dentistry. Works across clinical research, scientific writing, study documentation, evidence synthesis, and multidisciplinary collaboration. At Voithy, contributes to the scientific development and validation planning of digital health technologies, linking clinical perspective with research execution, R&D documentation, regulatory-facing evidence needs, funding materials, and academic partnerships. At the School of Dentistry, University of São Paulo (FOB-USP), contributes to AI-oriented research methods for postoperative assessment in oral soft tissue surgery. Research track record includes peer-reviewed publications in reproducibility, measurement reliability, CBCT/3D-printing workflows, and forensic/legal evidence records.

SELECTED EVIDENCE MARKERS

- PhD in Health Sciences developed through international collaboration between the Federal University of Bahia, Brazil, and the University of Coimbra, Portugal.
- Invited research activity linked to the University of Coimbra and the National Institute of Legal Medicine and Forensic Sciences (INMLCF), Portugal.
- Current research activity focused on artificial intelligence applications for postoperative assessment in oral soft tissue surgery.
- Peer-reviewed publications in 2023 and 2024 on reproducibility, measurement reliability, CBCT/3D printing, and imaging-based workflows.
- Experience producing scientific content, research protocols, evidence summaries, and structured documentation for traceability.
- Participation in multicultural and interdisciplinary research environments across Brazil and Europe.
- Selected participant in Cantanhede i-Days 2023 - Europe, an interdisciplinary innovation program focused on real-world challenges.
- Conference abstract addressing data protection and regulatory compliance themes in 2022.

RESEARCH AREAS

- Clinical research and digital health technology validation
- Artificial intelligence in oral health and clinical applications
- Postoperative assessment in oral soft tissue surgery
- Three-dimensional technologies, CBCT workflows, and forensic sciences
- Evidence synthesis, study protocol development, and scientific reporting

PROFESSIONAL EXPERIENCE

Voithy - Clinical Research Officer | Apr 2025 - Present

- Contributes clinical and scientific input to the development and validation planning of digital health solutions.
- Supports evidence-generation workstreams, including study logic, research documentation, structured data capture needs, and evidence reporting.
- Prepares scientific and institutional content for grant applications, partnership discussions, and R&D materials.
- Translates clinical research concepts into clear documentation for multidisciplinary teams working across product, engineering, regulatory, and business functions.
- Supports academic and institutional partnership development by framing research objectives, validation needs, and collaborative evidence outputs.
- Maintains a research-facing role in discussions on digital health validation, medication-support workflows, and remote care evidence generation.

School of Dentistry, University of São Paulo (FOB-USP), Brazil - Clinical Research Member | 2026 - Present

- Develops AI-focused research methodologies for oral healthcare, with emphasis on postoperative assessment in oral soft tissue surgery.
- Contributes clinical and scientific input to study design, research questions, and protocol structure.
- Conducts literature review and evidence synthesis to support methodology selection and protocol justification.
- Prepares scientific documentation and reporting materials for interdisciplinary research collaboration.
- Collaborates with academic researchers across dentistry, imaging, and AI-related domains.

University of Coimbra - Invited Researcher | 2022

- Participated in structured academic research workflows and cross-institutional collaboration.
- Applied reproducibility and reliability methods in imaging-based contexts at INMLCF.
- Supported documentation, analysis preparation, and scientific reporting within an international research environment.

EDUCATION

- PhD in Health Sciences- Federal University of Bahia, Brazil, in partnership with the University of Coimbra, Portugal | 2019 – 2023.
- MSc in Health Sciences- Federal University of Bahia, Brazil | 2017-2019.
- Postgraduate Residency in Multiprofessional Health Care – Adult Health- Federal University of Bahia, Brazil | 2015-2017.
- Bachelor's Degree in Dentistry (DDS equivalent)- Federal University of Bahia, Brazil | 2010-2015.

METHODS AND COMPETENCIES

- Study protocol design, research question structuring, structured data capture, analysis planning, and evidence reporting.
- Literature review, evidence synthesis, scientific writing, and documentation for research traceability.
- Research-context awareness of data protection, ethics, and regulatory compliance requirements.
- Tools: PubMed, LILACS, SciELO, Cochrane Library, MEDLINE, Mendeley, Zotero.

SELECTED PUBLICATIONS

3D printing and CBCT anatomical reproducibility assessment in forensic scenarios. Journal of Forensic and Legal Medicine, 2024. DOI: 10.1016/j.jflm.2024.102719

Orofacial assessment as digital path for forensic and legal evidence record. Forensic Sciences Research, 2024. DOI: 10.1093/fsr/owae006

Reproducibility of human landmark identification in morphological mandible prototypes. Forensic Sciences Research, 2023. DOI: 10.1093/fsr/owad029

Data protection and regulation compliance on handling physical child abuse scenarios. ICMLLM 2022 - International Conference on Medical Law and Legal Medicine, Paris, France. Conference abstract.

LANGUAGES

Languages: Portuguese, English.

NOTES

Full degree record and publication/research information accessible through ORCID, CIÊNCIA ID, and CNPq Lattes links above.
